

Technology on the Cutting Edge

Faball Enterprises brings the latest advances in Dual Density technology into a new lower cost product line "RAZOR"™. The "RAZOR" features two unique coverstock formulations with the High RG Dual Density "Compound Core" design.

The "RED RAZOR" has the new ripping "HPF" coverstock material designed to give the hitting power or a reactive and controllability of a urethane. Comes sanded and ready for use on medium to oily lanes.

The "BERRY REACTIVE RAZOR" slices through previous industry standards with the introduction of "HAMMERTHANE", the cutting edge in reactive coverstock materials. Factory finished dull for oily conditions, it's versatile coverstock is easily polished to adapt to medium to dry conditions.

The "RAZOR" line is built to give any bowler clean front end projection with the slashing hard back end reaction needed on today's lane conditions. Best of all, the "RAZOR" will let you cut through the opposition without cutting a hole in your pocket. Shave away the competition with the Cutting Edge technology of the "RAZOR".
