

G-FORCE

A FORCE TO BE RECKONED WITH

Are you ready for the speed and power of the new G-Force?

Lane #1 unveils its all new W.A.S. core, featuring a new warped asymmetrical symmetrical design unmatched by the competition. This high energy W.A.S. diamond produces a mass bias not found in any symmetrical core design.

All this energy inside of our lane gripping solid Detonator coverstock cuts through the heaviest oils, then pulls an unforeseen amount of G's the pins can't withstand when cornering down the lane.

Light years ahead of the competition, how many G's can you handle?
