

World Class Bowling Balls

# Just Unleashed

Meaner, Greener, It's "Gatorthane"

JAB Technologies' new "Reactive" GATOR™ features the latest technology in Reactive Resin bowling balls. We at JAB Technologies have introduced the most advanced, most aggressive coverstock on the market today – combined with the newest high density core – resulting in use for a variety of lane conditions. "Reactive" GATOR is easily sanded to roll thru the heaviest oil, easily polished for that "Gator Snap" on the back end.

The new "Reactive" GATOR will be chewing up and spitting out pins everywhere. Look for "Reactive" GATOR at better proshops worldwide.

The NEW "Reactive" GATOR will be unleashed Thanksgiving weekend at the *Super Hoinke Classic* in Cincinnati, Ohio.

Meets and exceeds ABC/WIBC and PBA standards. Available in 14#, 15# and 16#.

For more details, call JAB Technologies or see JAB Representative, Rudy "REVS" Kasimakis, at the *Super Hoinke Classic*.
