

RadioActive™

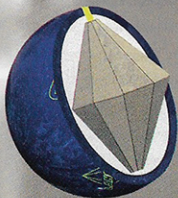

Resin

URANIUM™

Buzzsaw™

The Ball That Does It All..!!

The Uranium Buzzsaw features our new RadioActive™ coverstock. This new material is clean thru the front and Atomic on the backend. We've also changed the Isotope in our patented diamond core, using the densest material allowable by the ABC. The super dense, center heavy, Uranium Buzzsaw diamond core lowers the RG from a 2.53 to a 2.45 while raising the Differential from a .028 to the midrange of .043.

Combined with our new RadioActive™ coverstock, this ball glides thru the drier fronts, while sticking to the lane in oil. The Uranium Buzzsaw is the ball that does it all..!!
