*Lane #1 Responsible. Total Destruction for Millions of Pins Inevitable.*

by V. S. Brown  
Staff Writer

While the world slept, Lane #1, Home of "The Buzzsaw" in Central New York State was uncovered as the world's source of weapons of mass destruction.

Reported to have recently added to their arsenal of weaponry, authorities are currently on the lookout for "The Solid Uranium." As the most recent addition to their weapons of mass destruction stockpile, the Solid Uranium's diamond core is reportedly made with the densest materials allowed by the ABC, obliterating pins as it destroys oily lanes.
