

**Lane Masters™**

*Morpheus Dream at a glance*

Endurance Solid cover is a new cover not used on previous balls in the Morpheus line before so this time we beefed up the cover to handle the weight block. This cover combined with the block will give you a sharp strong backend that the other Morpheus Balls didn't give even when sanded. The weight block is an asymmetrical piece that pushed the limits on USBC specs but now its approved and ready
