

# Pearl Reactive Colossus

The **Pearl Reactive Colossus**, featuring a dual density version of the extremely powerful Colossus core surrounded by our all new **Gripper SR** "Super Reactive" coverstock, is designed for players who desire a straighter trajectory and/or a later breakpoint on medium to dry lanes. This core/cover combination yields a strong angular backend reaction, making less oily lane conditions easy to read, while still maintaining the same great pin carry of the original Colossus that players have been raving about all season long. The Pearl Reactive Colossus is manufactured with a polished surface to help combat drier lane conditions. If a slightly earlier or smoother breakpoint is desired, lightly scuff the surface. If a bowler wants an even earlier breakpoint or more overall hook, drill the original Colossus with **Gripper EF** "Enhanced Friction" particle coverstock, for all the hook you'll ever need!

## TECHNICAL INFORMATION

Pearl Reactive Colossus

<b>Average RG</b>	2.554
<b>Differential</b>	.043
<b>Flare Potential</b>	Medium
<b>Cover Stock</b>	Gripper SR (super reactive)
<b>Core Type</b>	MOTION Tuned Free-Form
<b>Core Dynamics</b>	Strongly Enhanced Mass Bias
<b>Ball Structure</b>	Dual Density Core, Dual Shell
<b>Factory Finish</b>	Polished
<b>Ball Color</b>	Pewter Pearl with Silver Logo

## Ball Paths

	PEARL REACTIVE COLOSSUS
	COLOSSUS Compound Factory Finish
	COLOSSUS Spun w/ Burgundy Pad

PEARL REACTIVE  
**COLOSSUS**  
AVAILABLE WEIGHTS: 13-16

An Industry First: Every Colossus and Pearl Reactive Colossus is precision spun on a "free spin" ball spinner (The DeTerminator) to accurately locate and mark the mass bias (RC), ensuring accurate layouts and ball reaction.
