

BRING THE HEAT

MEDIUM-HEAVY OIL

The new Forge™ Fire brings the heat to the medium-heavy oil Forge™ line. Featuring the new Infusion™ Hybrid Reactive coverstock, the Forge™ Fire has a much faster response to friction than the original Forge™. This eye popping low rg/high differential symmetrical piece is a must have for people looking to stand out and strike!

INFUSION™ HYBRID REACTIVE

The Infusion™ cover is an incredibly angular hybrid shell. This quick response cover will perform best on medium-heavy oil patterns when the bowler needs to create angle, but cannot "ball down" into truly skid/flip bowling balls.

DETONATOR™ WEIGHT BLOCK

The Detonator™ core is a fast-spinning, high differential core that allows the ball to create angle in high concentrations of oil.

4000 GRIT LSS FINISH

The 4000 Grit LSS finish provides length through the front of the lane with enough traction to create a strong reaction on the backend.
