

ARMED AND DANGEROUS

MEDIUM OIL

Following the overwhelming response and competitive success of the Covert Tank™, MOTIV® is proud to present the next stage in microcell polymer technology, the Tank™ Blitz. The Tank™ Blitz provides a new shape for competitive bowlers and also gives average bowlers a very early and smooth option for medium oil conditions.

FRIXION+™ MICROCELL POLYMER

Featuring new Frixion+™ Microcell Polymer cover stock, the Tank™ Blitz is earlier and smoother than the Covert Tank™. To create this powerful new Frixion+™ cover, MOTIV® engineers boosted the oil absorption rate of the microcell polymer to handle higher concentrations of oil.

GEAR™ WEIGHT BLOCK

With a low RG and differential, the Gear™ core provides low flare layout options to produce a stronger, more traditional urethane shape, but with far better continuation.

15# RG: 2.48

15# Diff: .034

Flare: 3"+

2000 GRIT LSS FINISH

The 2000 Grit LSS finish provides a very early and smooth ball motion to complement the Microcell Polymer cover stock.
