BLUE CORAL VENOM™

LIGHT-MEDIUM OIL

The Blue Coral Venom™ is the first ever hybrid asymmetric found in the 10 year history of the Venom™ line. The latest stage of evolution in the wildly successful Venom™ line, the Blue Coral Venom™ focuses on versatility and benchmark reaction for moderately high friction surfaces. An upgrade to the Venom™ Recoil, the Blue Coral Venom™ provides more traction in the oil with a stronger and more continuous down lane motion.

GEAR™ APG WEIGHT BLOCK

The low differential and asymmetry of the Gear™ APG core allows the Blue Coral Venom™ to attack the pins from shallower angles using a more aggressive cover stock.

COERCION™ MFH REACTIVE

The Coercion™ MFH Reactive cover provides plenty of length through the front of the lane, while picking up in the middle of the lane with a smooth and controllable transition. This hybrid cover is remarkable thanks to its ability to provide traction in the oil, without sacrificing control down lane. This performance provides the strength and incredible versatility that the Venom™ line is known for.

4000 GRIT LSS FINISH

A 4000 Grit LSS finish pairs with this hybrid cover to provide length through the front of the lane without sacrificing traction in the middle portion of the lane.
