

Everyone wants an **ADVANTAGE!**

Now you can have one!

Introducing the *Norm Duke Advantage Series*
High Performance Reactive
Urethane Bowling Balls

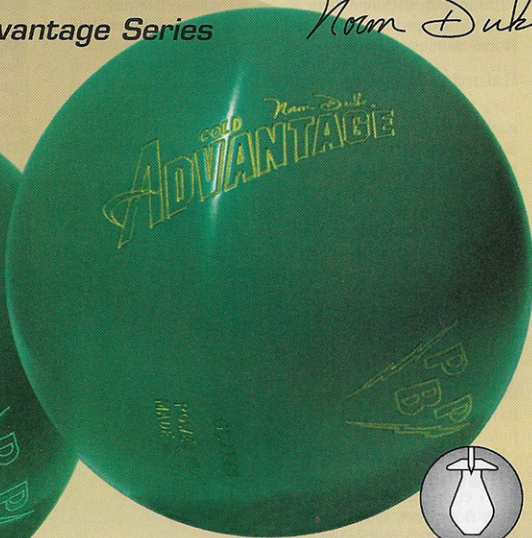

Norm Duke

Norm Duke Silver Advantage

An elliptical shaped core combined with our Tri-link 696R reactive coverstock provides maximum control of hook pattern with maximum impact on the pins. Heavy hitters and strokers will both find an "Advantage" on a wet/dry condition or on a dry back end.

Flare Potential: 1" to 3" ■ Hook Potential: 14-10 dull/shiny
Hardness: 75-76

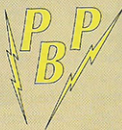

Norm Duke Gold Advantage

A high RG Core combined with Tri-link 696R reactive coverstock provides strong hook and finish on heavy oil. This ball gets through the heads cleanly with a strong back-end reaction. The added flip block works well for the "down and in" player yet retains plenty of energy for the power player.

Flare Potential: 1" to 5" ■ Hook Potential: 18-14 dull/shiny
Hardness: 75-76
