REAL STRIKING BEAUTIES

Star Trak's "Easy Rider" double-ball bowling bags are the perfect blend of beauty and comfort. Their design and colorful appearance are in keeping with today's fashion-conscious bowler. Available in Black, Blue and Burgundy, Star Trak's "Easy Riders" ride easy on your hip, eliminating the hip-bruising sway caused by other double bags.

Looking for more hooking power when the lanes are heavily oiled? Roll the "Force 10," the ball the pros depend on for sweeping power. Small core and high density axis weight assure consistency. More pin carry because there's less deflection.

When the bowling condition is "medium oil," reach for the "Equalizer." Two electronically balanced cores and two special design weight blocks on the axis give you devastating strike power. Delays the moment of inertia until the exact time.

Today's revolutionary "limited distance dressing" (short oil) requirements have changed the game, but Star Trak's "Reactor" takes away the guesswork. Specialty control hooking weight block allows ball to travel farther before hooking.
