RG Intermediate: 2.564
RG Min: 2.536
RG Diff: 0.044
Asymmetric Diff: 0.016
12 - 16 lbs.

They'll know. As soon as you pull it out of the bag. This is no ordinary follow-the-crowd, status-quo, go-unnoticed kind of ball. This is Rebel. With ECX (Elliptical Cross Section) – new core technology that provides unparalleled ball-to-ball consistency. Forget the common trick of adding “pucks” to symmetrical cores, ECX is the only elliptical asymmetric core in bowling. Allowing more aggressive, higher RG pin positions. To help you get through the front end. To deliver a wider range of back-end reactions. And to deal out devastating results. Be a Rebel. Roll a Rebel.
