

Riot Zone. Coverstock: Proactive, Trizact[®] Finished • Traction Characteristic: Delayed Traction Effect (DTX) 2 • Hook Potential: 20-12 (dull/shiny) • Length: 5 • Backend: 12 • Average RG: 5.8

Kick the canes!

Riot Zone!

The best of Danger Zone[™] HPD plus a pearized coverstock and totally new core. And more length and backend than ANY other Proactive[®]. You'll love it. They'll hate it. So go ahead, incite a Riot.

Moving the core weight closer to the cover (perimeter weighting) pushes the ball down the lane for medium to arrier conditions, and provides a more forgiving reaction when you don't throw the perfect shot.
