

In Quest of Higher Scores?

Make your Assault!

The new Roto Grip® Assault™ is a work of art in bowling ball innovation. The all-new Concave Radius™ High Torque weight block is the most versatile weight block ever. Concaving one side of the weight block acts as a dynamic counterbalance providing constant motion for strong Hook-&-Roll characteristics.

Encasing the weight block is an improved Sure Grip Traction Plus™ cover with increased particle loading that maintains traction in the heaviest of oil. The Traction Plus cover is easily adjusted with the use of pads, sand paper and polishes.
