Improve your score by getting a ball made just right for you... for any oiling condition.

Now you can get higher scores with the quality and technology of Star Trax bowling balls.

Consistent quality ball after ball.

Star Trax uses only first-grade urethanes to make every ball a top performer for you. Surface and shell hardness are matched to strict engineering requirements. And every ball's core and weight placement is consistent with its performance design.

You always get high-scoring performance.

The Star Trax lineup offers a perfect match for you on any lane condition.

ST-10
Pancake-style weight block.

EQUALIZER
Dual core and weight blocks. Electronically balanced.

The New X-15. The X-15 has triple combination weights and a thick shell made in two hardnesses/finishes for either short or heavy oil. An innovative, hard-hitting ball, it's already proving to be a leader by keeping pins low and mixing.

The Equalizer. This original dual core and dual weight block ball gives you a 50% greater chance of getting one weight block into the pocket for increased strikes. Its thick shell is made in three hardnesses/finishes for short, medium or heavy oil.

The ST-10. A great all-round ball for today's lane conditions. Made with a high-density core and tough shell, it's a good short-oil ball for bowlers of all ages.

X-15
Special combination weight blocks.

Star Trax makes each ball the right ball for you. For more information, contact 1-800-543-1886. 690 South Chestnut St., Ravenna, Ohio.
