

# PHAZE™ V

## IT'S NOT JUST A PHAZE

Can you feel it? That's power. Pure, unchecked tournament-winning power. Combining proven technologies, the Phaze V is an alchemy of components that will provide nothing but soaring scores. Every ball has the general desire to imagine itself as the start of something entirely new, un beholden to what has come before. When the salt settles, we're left with neither triumph nor tragedy. Instead, it's one more chapter in the continuing saga, punctuated by a moment of genuine awe. One of those moments is right now.

## INTEGRATED IN EVERY WAY

This low RG jewel has a strong heart. Being one of the most aggressive symmetrical balls ever devised, your shots become more comfortable so you can bowl with effortless focus on your shot quality. The Velocity Core is designed to help you play at pace with more revs, power and control, for true consistency. There is a reason this construction has turned into the go-to chassis for professionals around the world.

The Phaze series' aggressive nature has carried over to the Phaze V. This time, it focuses its power on the backend, where it matters most. R2S Pearl is the missing ingredient Storm Nation has been craving for years. You spoke. We listened. Storm's new Reacta Gloss finish is sure to give you the length you've been craving with entry unmatched in the marketplace. This new finish has been tested true, and gives the reliability of supreme float on the most arid of conditions.

Prepare to be enthralled by the new Phaze V that exceeds every definition of intense.
