

# GET MOTIVATED

Push your game ahead of the competition with an arsenal of MOTIV™ bowling gear. Made in the USA, each MOTIV™ bowling ball is a unique weapon designed with a purpose.

EFFECTIVE 9/11/2009

The GT1 has a powerful Gear Drive™ engine and a very aggressive tread. Designed for medium to heavy oil, the GT1 is often the first ball out of the bag. If you need a more controllable shot with a smooth breakpoint on medium oil, reach for the SX1 or TX1. The SX1, in particular, has been getting great reviews on short sport patterns. And, when competition puts you on a pair of lanes that are flooded with oil, our new MOTIV™ TR2 is the answer. With an 800 sanded finish, it carves through oil and punishes the pins.
