

Are You a FULL ROLLER Bowler?

We make a ball that has to out-score
the ball you are now bowling!

(Because Randolph is the only company that makes a ball
to favor the way a full roller bowls.)

"Dr. Mike" Ukrainiec
Akron, Ohio
(216) 724-8229

**"Dr. Mike" Ukrainiec (190 av. full
roller) Internationally known
ball driller and consultant says:**

*"Being a full roller - I score consistantly higher with
the Tech II than any other ball made today, I've
tried them all - that convinced me - I only bowl
Randolph now."*

Many bowlers have discovered that the Technika II
top weight-system * makes a ball roll smooth and
true, comes up in the pocked and hits with
explosive pin action as Dr. Mike would say "It rips
the rack" better than any ball available today.

*"The only ball I've ever rolled that blows the pins
down and back - it hits so hard they even come off
the side board to clean the deck - even when I
accidently pull-the-ball and hit Brooklyn, Tech II
will carry."*

The secrets is the patented weight - block design
covered with a special resin formula - (we never use
cork, sawdust or fillers that absorb the pin shock.)

Available in 3 surface hardness so you can handle
any lane conditions, 14-15-16 lbs.

If our customers calls and letters are any indication
— the Tech II will out perform whatever ball you are
now rolling - make us prove it.

*New Patent
