

Release the ANIMAL in you!

As Dr. Strike drank the formula for the Morpheus 2.0 technology mixed with the Mega Fang coverstock...

...He felt something awaken within.

The Animal is the most technologically advanced ball produced in the history of TRACK.

The Morpheus 2.0 core uses six pieces of different densities to achieve a balance of control of the breakpoint and overall hook ability.

The addition of a wing attachment on the opposing side of the rev plate increases the Animal's mid-lane control while the aggressive Mega Fang coverstock provides its lane gripping ability.

There is so much power inside the Animal that we had to use our Clean N Sheen compound to tame this wild beast.

Put an Animal in your hand and be an Animal on the lane.
