

## Hit-and-Run Suspect

Investigators are sifting through the rubble left after a lane-splintering crash at a local bowling center. Authorities say

the prime suspect at this hour is the CRASH, Track's latest punisher. Witnesses say the Crash is a devastating combination of great looks and rack-shattering backend. The suspect is described as a Power Plus reactive coverstock that harnesses the power of a 4 piece multi-density core.

Track company officials admit the Crash corners hard enough to leave the competition rubber-necking as it destroys the pins. They believe this ball is on course to CRASH a lot more
