CRUNCH FACTS

Do you feel the need to put a "Crunch" on your competition? If so, check out the Crunch, Track's latest addition to the mid price arsenal. At the heart of the Crunch you will find a multi-density core featuring a dense Rev Sphere. The Rev Sphere helps the ball rev harder in the midlane providing the bowler with the ability to control the breakpoint without losing backend. The Power Plus resin coverstock will provide the traction necessary to handle today's slicker lane oils. The Crunch is a great addition to the tournament player's arsenal as well as the league bowler's primary ball. Don't make your opponent squeeze... Crunch 'em!

SPECS
