

CROSS OVER TO THE DARKSIDE

Strange things happen at Track when you turn off the lights and lock the doors. Recently we left a Hex and a Hextreme next to each other in our research facility and when we came back the next morning there was only one ball. It seems that the Hex and Hextreme came together to form one ball called the Hex Darkside. The Darkside combines the midlane control that made the Hex such a great ball with the strong backend of the Hextreme that turned your opponents heads. Strangely enough this mutation created a great performing ball at a shockingly affordable price. Put this ball in your hand and break on through to the DARKSIDE!

SPECS

HOOK RATING (DULL-POLISHED):	27 - 19
LENGTH (1-10):	6.5
BACKEND (1-10):	7
CORE TECHNOLOGY:	Modified 2-Piece
CORE POWER RATING (1-10):	7.5
