

UNLEASH THE ENERGY OF KINETIC

Kinetic relates to the motion of material bodies and the forces and energy associated there within. This ball features a newly-designed low mass bias core called Shuttle and a new veneer called UMP GEN 1. The best way to describe Kinetic's motion is simply Skid/Flip. Using a low mass bias designed core shape we have created a ball that is great for medium to heavy conditions and works well when you need to get the ball to flip on the backend.

Kinetic

BALL NAME	KINETIC
STYLE	# 029744-1120
COLOR	BLUE/BLACK
REACTION	SKID/FLIP
COVER STOCK	UMP GEN1
CORE	SHUTTLE
WEIGHTS	12-16 LBS
FACTORY FINISH	2000 GRIT ABRALON SANDED WITH POWERHOUSE™ FACTORY FINISH
RG	2.48
DIFFERENTIAL	0.040
INTERMEDIATE DIFFERENTIAL	0.005
MOTION SHAPE	SKID/FLIP
BEST LANE CONDITION	MEDIUM TO HEAVY OIL
