

Mr. Technology Has Returned.

I'm back and ready to reload the Track arsenal with the most technologically advanced bowling balls on the market. Our newest vision, **Machine**, is equipped with a redesigned Robo Core boasting the strongest intermediate Mass Bias measurement (.025) in Track's long history of revolutionary core designs. Matched with the Fang LS coverstock, this ball makes the strongest transition from oil to dry on the market today. This high-powered engine will take you places only champions dare to go!

— Del Warren, President

MACHINE

Track Flare: 7"

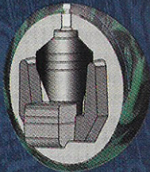

Hook Rating:
Dull 42, Polished 34
