

# MUTANT

## The Morpheus\* core has mutated again!

With the addition of another hemisphere attachment on the Rev Plate, we have created the strongest mid-lane reaction out of any Track ball to date. The Mutant design can easily tackle the slickest of today's lane conditions while maintaining the versatility of the Freak and Freak Out.

- Morpheus\* core revs up harder when it encounters lane friction, creating a pronounced angular breakpoint, which can easily be tamed.
- Reads the breakpoint easily, continuing all the way through the pins.
- WOW II particle coverstock allows the ball to handle diverse lane conditions and diverse styles.
- Maintains axis rotation longer with an enhanced angular breakpoint.
- Dynamically spun at the factory to ensure precise ball reaction.

Morpheus\* High-Revving

### SPECS

Hook Rating (Dull-Polished) 34-27  
 Length (1-10) 2.5  
 Backband (1-10) 9  
 Core Technology Morpheus\*+High Revving  
 Core Power Rating (1-10) 9  
 Radius of Gyration 2.50  
 Differential .056  
 Intermediate Differential .013  
 Determinator Spin Time 8.0 seconds  
 Flare Potential (Inches) 7  
 Coverstock WOW 2-Particle  
 Color Blue Pearl/Blue Solid  
 Friction Rating (1-10) 9.5  
 Factory Finish 1500 Smooth  
 Recommended Polish Track Magic - Magic Shine  
 Reaction Shape Strong Arc  
 Lane Condition Heavy Oil  
 Available Weights 14-16 lbs. "Morpheus Technology"  
 12-13 lbs. "Core 2 Technology"
