

**WE GAVE IT A NEW COAT.**

**OF ARMOR.**

**INTRODUCING SENSOR XCEL. SUPER NEW COVERSTOCK. SUPER NEW CORE.**

As a proven leader in technology, Track is dedicated to taking performance to the next level. The Sensor Xcel is the newest example of this philosophy. By blending the resins of our best high performance balls with a new secret ingredient designed to enhance the overall gripping action of the successful Versathane™, Track introduces the Sensor Xcel with "Superthane™". This is the newest and most aggressive coverstock we have ever developed. We've wrapped "Superthane" around a single density medium flare core to conserve energy and yield a strong yet readable pattern. This combination of core and coverstock gives the Sensor Xcel tremendous performance at a price that's attractive to everyone. Arm yourself, with the Sensor Xcel.
