

STOMP

the competition.

Rolling over pins and opponents alike has never been easier or more affordable thanks to the new Track STOMP™. The STOMP features a Dual Flip Block core design and PowerPlus II™ coverstock with Gold MICA. This combination allows the ball to easily float through the front part of the lane, storing energy for a dramatic turn in the backend of the lane. STOMP provides bowlers with the ball reaction not available in any other current Track product. Crush both the pins and the competition into the ground with Track's new STOMP.

EVOLUTIONARY. REVOLUTIONARY.
