

A TECHNICAL KNOCKOUT

By now you are probably aware of the tremendous success of the Track SYNERGY ball. On the PBA Tour, players like Butch Soper, Tommy Delutz, Jr., Bob Benoit, Dave D'Entremont and Steve Wilson have already shown what this ball is capable of, on national television. League bowlers have contacted us to say that they are amazed by its overall hook potential, sharp turning backend reaction and its tremendous hitting power.

Part of the success of the SYNERGY can be directly attributed to the versatility it offers. The following chart shows some recommended drilling options so you can match your bowling style to the lane conditions that you bowl on most often.

PLAYER'S STYLE

			
	0° AXIS TILT (FORWARD ROLL)	45° AXIS TILT (MEDIUM SIDE ROLL)	90° AXIS TILT (MAXIMUM SIDE ROLL)

LANE CONDITIONS

HEADS..... HEAVY OIL BACKENDS.....DRY	DRILLING #5 Place pin 4 1/2" and CG 2" from PAP	DRILLING #6 Axis leverage	DRILLING #7 Axis leverage with extra hole below PAP
HEADS.....MEDIUM OIL BACKENDS...AVERAGE CARRYDOWN	DRILLING #3 Place pin 4 1/2" and CG 3" from PAP	DRILLING #4 Full leverage	DRILLING #5 Place pin 4 1/2" and CG 2" from PAP
HEADS...DRY BACKENDS...HEAVY CARRYDOWN	DRILLING #1 Label drilling with pin 5" from PAP and CG located for 1/2 ounce side wt.	DRILLING #2 Label drilling with pin in leverage position and CG located for 1/2 ounce side wt.	DRILLING #3 Place pin 4 1/2" and CG 3" from PAP
WET / DRY	DRILLING #4 Full leverage	DRILLING #6 Axis leverage	DRILLING #7 Axis leverage with extra hole below PAP

PAP= Positive axis point • CG= Ball's center of gravity • Pin= Top/center of weight block
Drilling # comes from SYNERGY drilling instructions located in each bowling ball box.

Synergy (sin' or jē)n. The simultaneous action of separate components which, together, have a greater total effect than the sum of their individual parts. Track has taken the best of the best and Synergized it.

SYNERGY contains Track's patented POWERTECH™ Ceramic Core in the center of its modified 4-piece core construction. The VERSATHANE XH (eXtra Hook) coverstock is our latest, highest technology material. All together, we have created the most destructive hitting machine on the market today! The SYNERGY. Technically speaking, it's a knockout.
