

Over his career
our new man has
knocked 'em down
with jabs,
straight rights,
uppercuts and
hooks.

From now on he's
going strictly with the hook.

Sugar Ray Leonard's back and he's delivering a powerful new hook. The K.O. Punch. The Triton T.K.O. K.O. PUNCH features Track's new "Power Punch" modified 2-piece core technology. We've wrapped our new enhanced POWERPLUS II with Gold MICA coverstock around this new core design to create a powerful yet controlled backend reaction. This combination makes the K.O. Punch the one ball that is perfect for today's lane conditions. You can use it the first game of the league when there is heavy oil in the front part and hooking backends, and still score great the third game when the conditions have broken down in the heads and the oil has carried down. The competition better duck.

EVOLUTIONARY. REVOLUTIONARY.
