

Emerging from the chaos and confusion of the bowling industry...

A NEW COMPANY WITH A TRUE VISION OF BOWLING'S FUTURE. BY COMBINING YEARS OF EXTENSIVE RESEARCH AND RADICAL BALL PERFORMANCE THEORIES WITH A NEW PATENT-PENDING HIGH PRESSURE TECHNOLOGY; VISIONARY HAS PRODUCED A PAIR OF HIGH PERFORMING BALLS DESTINED TO REVOLUTIONIZE YOUR GAME!

Stepping beyond the confines of conventional thought, the WARLOCK™ was created to destroy. The precise combination of the dual density core and HPTRU™ coverstock generates an aggressive nature that radiates confidence and intimidation. Shrouded in twilight blue, the WARLOCK shows no mercy as it comes for its victims from virtually any angle. With an awesome flare of pure power, the WARLOCK destroys pins, records, and opponents.

The Warlock's non-reactive counterpart, the SORCERER™, was conjured up to be the ultimate in versatility. While possessing the same dynamic weight block as the Warlock, the unparalleled HPTU™ coverstock gives the SORCERER the power to adapt to most any condition with a simple change in surface finish. Cloaked in fireball red, the SORCERER's smooth rolling approach conceals an explosive power which is released upon impact. And in case you're wondering, as with the Warlock, mercy is in short supply.
