

Foretold in ancient tomes of wisdom,
an object of insurmountable power
would be brought forth to aid
in the war on the lanes...

The PROPHECY is FULFILLED

VISIONARY BOWLING PRODUCTS

WARLOCK[®] DC

The Warlock DC (Differential Control) is a pearlized reactive with the same oil repelling additive used in the Orange Warlock. The unique weight block consists of a cube with 6 cylindrical arms, three of which have caps of different densities. It's the third cap on the side that produces mass bias, additional torque, and a high differential (0.070"); providing plenty of flare and crushing back end reaction.

****This ad is not a true representation of the balls appearance, the ball is not transparent****
