

I've got the best balls in bowling!

Wayne Webb

Dyno-Thane Bowling Balls

I've won 3 PBA tournaments since I joined Dyno-Thane in 1996, I have helped design and develop all our products since that time, and I even invested my own money in buying part of the company. I'm convinced...you should be too!

Our latest innovation... The Rx with our unique Flow In Integrated Core (pat. pend.) is designed to solidify the core/shell relationship to maximize hitting power. This is the first core design where the shell material becomes part of the core and is used to control rg and flare. Our new **SHD** cover stock is our most aggressive ever making the Rx ball something very different!

Ball Specifications -

- highly aggressive **SHD** Cover Stock
- hook Rating 19
- rg's 2.54 and 2.59
- track flare medium to high
- dual density flow in core
- hitting power... unbelievable!
